The Accelerated Weekend Experience (AWE) provides academically talented students in grades 5 through 8 a full, single weekend to explore an area of study in depth with an expert in the field.

- Gain insight into careers in math, science or technology.
- Engage with like-minded peers and motivating instructors.

AWE courses run Saturday and Sunday from 9 a.m. to 2:30 p.m. Courses are offered in partnership with host sites, most often a school or community organization.

A Sampling of Popular AWE Courses include:

- Alice 3D Programming
- Aviation
- Cognitive Neuroscience
- Cryptography
- Digital Imaging
- Forensic Science
- Java Computer Programming
- Marine Biology
- Pure Mathematics
- Robocode
- Veterinary Medicine

Exciting AWE courses scheduled near you!

March 5 – 6, 2016, at Western Michigan University
Kalamazoo, MI  •  9 a.m. – 2:30 p.m. each day

**SCRATCH: AN INTRODUCTION TO COMPUTER PROGRAMMING**
*For Students in Grades 5–7*
Create your own digital stories, animations, games, music and art on a computer. Share these creations on the Internet with Scratch, a programming language designed to produce rich, interactive media while developing important 21st century skills. Students learn advanced mathematical and computational concepts while exploring the technological design process. Course participants share projects on the Scratch web site and join a global community of Scratch programmers for ongoing collaboration.

For more information on Scratch: http://scratch.mit.edu/
Subject area: Technology

**CRYPTOGRAPHY: MATH & CODES**
*For Students in Grades 7–9*
Once used largely in military operations, cryptography safeguards our identities in today’s Information Age. Students discover the origins of encoding in scytale and steganography as they create new codes and decode the projects of their fellow students. Using basic mathematics, modular arithmetic, factorization and exponents, participants raise the level of their math skills and math reasoning.

Subject area: Math
